

Fixed Click Type Torque Wrench With 5/8 Bit For
TNC Connectors Pre-set to 14 in-lbs

LC-TWC1458

Features

- Designed for continual use
- Will “click” once preset torque value is achieved
- Designed to avoid over torque

Applications

- Attaching test cables in lab environments
- Final production attachment
- Field install and testing applications
- Applying accurate torque
- Avoiding over torque

Description

LC-TWC1458 click type torque wrench, designed for TNC connectors, has a 5/8 bit with a preset value of 14 in-lbs. L-com’s LC-TWC1458 click type torque wrenches allow accurate mating force when assembling and disassembling a variety of RF coaxial connectors. The unique feature of click type RF wrenches is that once the preset torque value is reached, they will “click” which can be heard and felt, followed by a slight bend at the head, alerting the user to stop applying torque to the connector. L-com’s click type TNC torque wrenches are in-stock and are also available for a wide variety of other RF connectors, all of which ship the same day.

Configuration

Torque Type	Fixed
Design Type	Click Type
Hex Size	5/8 inch
Torque Setting	14 in-lbs [1.58 Nm]
Torque Accuracy Percentage	±4 %

Size

Length	6.8 in [172.72 mm]
Handle Diameter	0.77 in [19.56 mm]
Weight	0.41 lbs [185.97 g]
Handle Color	Blue

Compliance Certifications (see [product page](#) for current document)

Notes:

- Do not use on damaged connectors.
- To improve performance of a wrench that hasn’t been used recently, actuate the wrench by clicking the wrench head back and forth several times before use. This will spread the lubricant through the internal mechanism.
- Click type tools require smooth consistent application of force. Each torquing action should be completed within 2 seconds. Slower or faster torquing action will detract from accuracy.

Fixed Click Type Torque Wrench With 5/8 Bit For TNC Connectors Pre-set to 14 in-lbs from L-com has same day shipment for domestic
