

DVI DUAL-LINK EXTENDER FEMALE TO FEMALE **BOX STYLE**

DESCRIPTION:

The DVI Extender/Equalizer extends the DVI signal up to 150 feet while keeping the image 100% intact and pristine with resolutions up to 2560x1600 @60Hz. The extender simply takes the signal coming from the attached DVI source over 150 feet and equalize it, sending it over a short DVI cable to the display. The image will appear as if the source were right next to the display.

FEATURES:

1. Automatically provides compensation for DVI cables.
2. Supports HDTV resolutions up to 2560x1600 @60Hz
3. Compatible with VGA, SVGA, XGA, SXGA, UXGA
4. Supports standard DVI 1.0 and HDMI 1.3a
5. Extends the transition - minimized differential signaling (TMDS)
6. Interface length as follows:
 - 0 to 45 meters (150 feet) over DVI - cable, 24 AWG STP
 - 0 to 30 meters (100 feet) over DVI - cable, 28 AWG STP
7. Dimension: 61 mm x 51.8mm x 24mm
8. Housing: Black, plastic
9. Power adapter 5V 2A included
10. 8 level settable equalization

R05-EQL-FF

INCLUDED IN THE SET:
